

NEW LETTERS. APRIL- AGOSTO 2023

**Misión Metodista Unida. Quéssua. Malanje.
Angola Oriental. Leo García.**

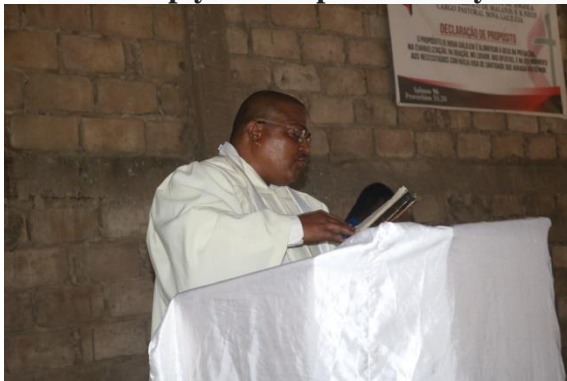

**“Wisdom, above all; Acquire wisdom, and
over all your possessions, acquire intelligence”
Proverbs 4:7**

Cordial Greetings to the churches and friends in faith who are connected with God’s mission around the world. We are very happy to update you on our missionary work in Eastern Angola.

Announcing the Gospel of Life.

It has been a privilege to be able to announce the Word of the Lord. We thank the pastors and churches who opened their doors invited me to assume the preaching of the Gospel.

"The empty tomb opens the way to life."

Academic work and leadership training at the Faculty of Theology of Quéssua (FMTQ).

I continue collaborating in the formation of leaders and pastors, as a professor and director of the scientific area, at the Faculty of Theology of Quéssua (FMTQ).

Wesleyan Theological Update Week. Dialogue on Grace. May 23, 2023. Photo by. Isabel Mussulo.

In the first semester of the current year, the Faculty of Theology of Quessua benefitted from an academic collaboration program with the Faculty of Theology of the Methodist University of Angola (UMA-FATEO).

Dean Dr. Elvira M. Cazombo and other professors hand out diplomas to recently graduated students. May 27, 2023.

In the last days of the month of May, 16 FMTQ students graduated and obtained their bachelor's degree in theology.

Celebration of the Regional Meeting of Missionaries of the Global Ministries for the Area of Africa in Maputo, Mozambique

The regional meeting for missionaries in Africa, held from April 20 - 27 of 2023, was an opportunity for open dialogue with directors, executive members, and with the general secretary of Global Ministries, Roland Fernandes.

Maputo Mozambique. April 2023

During the missionary meeting, we shared experiences with missionaries who serve in similar or different situations to ours. The regional meeting in Maputo – Mozambique was a memorable time where missionaries were reinvigorated in our call to service in mission.

The photo above is a patient with recurrent Malaria, receiving intravenous treatment with artesunate. By Cleivy. B. May 10, 2023

Malaria still continues to be the main cause of morbidity and mortality in Angola. Forms of Malaria that receive incomplete treatment evolve into chronic forms of the disease.

Maputo Mozambique April 2023

Missionary Activity in the area of Community Health.

I continue to serve as a physician for the Global Health Unit of Global Ministries at the Quessua Methodist Mission Health Center.

The Board of Health in East Angola has among its priorities, the prevention, control and treatment of communicable diseases, such as Malaria, Covid - 19, Tuberculosis, HIV-AIDS and others diseases.

Abdominal examination of a patient who has an enlarged liver and spleen due to Malaria. By Cleivy. B, May 2023.

Combining medical assistance with practical teaching.

The health technician students who are in train during their rotation period at the Hospital of Quessua, learn about techniques and procedures to carry out the physical examination of the patient and obtain better diagnostic guidance.

Teaching Students who perform at the Hospital in Quessua Mayo 2023.

Visits from the Health Center to Distant Communities.

The implementation of multi purpose mobile clinics in remote communities enables community interventions for the prevention, diagnosis and timely treatment of malaria, through the Imagine No Malaria Program (INM).

Mobile clinic of the Quessua Health Team in the Quimbanba community. May 2023

Future Perspectives.

As a Health team, we envision maintaining and increasing impartial access to health services in the

population that visits or lives around the Quessua mission.

Providing multipurpose mobile clinics will help carry out community intervention into distant areas for the prevention, diagnosis and timely treatment of Malaria through the INM program, without leaving behind the tracking of other chronic communicable and non-communicable diseases in relevant places at high rates of risk of morbidity and mortality in Angola.

The distribution of mosquito nets in distant areas and the promotion of reproductive sexual health through educational talks in the village, will be other activities to be carried out by our Health Board.

We thank you and invite you to remain united with the mission by your prayers and your gifts that enable us to better serve those in need.
